

```
1 package dataprovider.demo;
2
3 import org.testng.annotations.DataProvider;
4
5 public class DataProviderClass {
6
7     @DataProvider(name = "testData")
8     public Object[][] dataProvFunc() {
9         return new Object[][] {
10             { "Selenium" }, { "TestNG" }, { "Automation" } };
11     }
12
13 }
14
```
