```java
 1 package parallel.dataproviders;
 2
 3 import org.testng.annotations.DataProvider;
 4
 5 public class DataProviderDemo {
 6
 7     @DataProvider(name = "testData", parallel=true)
 8     public Object[][] dataProvFunc() {
 9         return new Object[][] {
10             {"","","Username cannot be empty"},
11             {"","Test","Username cannot be empty"},
12             {"$%1234","2345%$","Invalid credentials"}
13         };
14     }
15 }
16
17
```
